

CAREGIVER APPRECIATION MONTH

NOVEMBER 2020

MESSAGE FROM THE FIXEL TEAM

Members of the Fixel family,

November is Caregiver Month, and we want to take this opportunity to express in words what our hearts feel every day. We have the deepest respect, love, and gratitude for the care partners and companions of all those living with neurological diseases. Oftentimes, changes that impact a person are experienced in tandem, and the support, patience, and encouragement of a life partner makes all the difference. When symptoms change the way daily life carries on, the adjustments that continuously evolve impact the individual and his or her closest supports.

Thank you for being the eyes, ears, and strength that often keeps people with Parkinson disease and other neurological conditions continuing to live well!

With gratitude and admiration,

Irene Malaty, MD

On Behalf of the Parkinson Foundation Center of Excellence at UF
Fixel Institute for Neurological Diseases-University of Florida Movement Disorders
